OBJECTIVE

Third-year Computer Science student passionate about cybersecurity, with a strong work ethic shaped by military service and experience in sports and automotive photography. Skilled in leadership, communication, and problem-solving, I excel under pressure and look forward to applying these abilities in the field.

SKILLS

Leadership & Teamwork: Proven ability to lead teams in high-stakes environments, motivating others and ensuring mission success.

Problem-Solving: Razor-sharp analytical skills, honed through military training and a deep sense of discipline.

Communication: Clear, confident communicator in English, French, Ukrainian, and Russian, able to build relationships across cultures.

EDUCATION

Champlain College, Saint-Lambert
Computer Science

Expected Graduation: June, 2025

- Focused on building a strong foundation in cybersecurity and network security.
- Developed practical solutions through projects like building a key logger in python and a Pet Clinic Web Application in Java.
- Participated in a real client project, creating a full-stack Web Application for a Performance Group in Monreal

École secondaire Monseigneur-A.-M.-Parent
Science and Technology Program

Graduated: 2021

EXPERIENCE

Infanteer
Canadian Army

March 2024 - Present

- Led teams in high-pressure environments, demonstrating a no-fail mentality and delivering results on time.
- Used strategic thinking and situational awareness to solve problems efficiently while strengthening leadership skills and fostering a disciplined, team-oriented approach.

Freelance Photographer
Sports and Automotive Photography

2019 - Present

- Captured compelling images for high-profile clients, managing projects from start to finish with attention to quality and tight deadlines.
- Developed a sharp eye for detail and a creative mindset, enhancing both visual work and problem-solving abilities.

Yuzu Sushi
Cook, Waiter, and Cashier

January 2023 – June 2023

- Excelled in various roles, from meal preparation to customer service, while maintaining high quality in a fast-paced environment, strengthening multitasking abilities and attention to detail under pressure.
-

PROJECTS

Champlain Pet Clinic Web Application

It is a Pet Clinic Website which handles authentication, authorization, visit bookings, customer profiles and much more. Developing using Java, Spring Boot, React, Docker, and using the SCRUM methodology. Assuming the roles of SCRUM master and developer.

Lion Dance School Web Application

Developing a Web Application for a Martial Arts school, which helps with class management, enrolments and shows they do. Using SCRUM principles, developing using Java, Spring Boot and React programming. Assuming the roles of developer and designer.

Key-logger Project

Developed a simple key-logger app that communicates via Email. Developed using Python. I carried out the project on my own being the developer and presenter for the project.
